Read one chapter a night and answer the chapter review questions

➤ **Take out time to study**

Rome as they say wasn't built in a day, take time to draw up a time table that is feasible but not over stretched, plan your work, then work your plan.

➤ **Practice like the real exams using PMP Practice Simulated Exams**

Once you have completely read the book, take your first PMP practice exam. Calculate your score to see if you passed the 61% mark. If you passed, Congratulations!!! But don't be in a hurry to take the exam yet, there are still some steps to follow. If you didn't, don't worry, I didn't pass my first practice exam either, but I still went on to pass **the real exam** on my first attempt.

I recommend our partners product the [PM Exam Simulator®](#) for online real time, exam simulation which you can access from anywhere in the world.

If you find you need more exam simulators then email us on info@ritetraconsult.com.ng for more affordable quotes.

Re-read Head First PMP book or any of the books you now prefer using the same method of covering one chapter a night and answering the review questions. Pay close attention to the sections you didn't do so strongly in. Note them for further studies. Take your second PMP Practice exam. I recommend you visit www.ritetracpm.blogspot.com for free PMP exam questions today. These are the closest, free exams we could find on the internet that actually simulates the real exam.

Print out your mock exam attempts and place a red marker by the side of the questions you answered incorrectly and study these questions the next time exclusively to reduce time spent in studying. The simulators have an edge in analyzing the answers for you.

Register and take the real PMP exam within 2 weeks of taking your second, third practice exams and scoring over 75-85%.

- **Go in and PASS the exams on 1st Try!** Take the exam and go out and celebrate passing the PMP Certification exam. Enhance your career; join local chapters of PMI in your location. Let's hear your success stories!!!
